

Certificate in terms of air freight transportation

We hereby certify that the Lithium-ion batteries used in our product

e-motion M15

are tested according to UN Manual of Tests and Criteria" Part III subsection 38.3 and meet the requirements specified therein.

They are classified as UN 3480 (transported without e-motion M15) respectively as UN 3481 (transported together with e-motion M15) and are in compliance with the regulations or special provisions of

IATA Section IB of PI 965¹, Section II of PI 966²

Condition precedent to meet the above listed requirements is adherence to all safety instructions specified in the user manual, particularly that the Lithium-ion batteries *must not* be transported installed in the wheel.

²UN 3481 Section II of PI 966 (transported together with e-motion M15):

- Lithium Battery Handling label 7.1.C

¹UN 3480 Section IB of PI 965 (transported without e-motion M15):

- Lithium Battery Handling label 7.1.C
- Are forbidden as cargo on passenger aircraft label 7.4.B
- Class 9 Lithium Battery hazard label 7.3.X
- Must be shipped at a state of charge (SoC) not exceeding 30% of their rated design capacity.

This certificate does not apply to damaged or defect batteries according to Special Provision A154, these are forbidden for transport.

Due to the frequent amendments of the respective regulations, which partly occur on an annual basis this certificate is valid until **31st December 2026**.
